2:00pm – 4:30pm – Workshop commences 2:00pm sharp! Registration desk opens 1:30pm. Afternoon tea will be served.
VENUE: John Lindell Lecture Theatre, Level 4, Lance Townsend Building, Austin Hospital campus

REGISTER: ***Enrolment is essential. Please enrol through Themis***
Enrolments close Tuesday 22 May

This special training session has been designed to focus on issues that particularly arise for supervisors based in labs, hospitals and affiliated medical research institutes. Anyone who has recently participated in a supervisory training course is not required to attend. This workshop is NOT suitable for those new to Supervision.

Graduate supervision is doubtless one of the most intensive forms of teaching in higher education. Although the sustained complexity of supervision involves much time and energy, it is also one of the cornerstones of an academic career. This experienced supervisor refresher is specifically for MDHS staff based at the Austin Hospital and surrounds who supervise Research Higher Degree candidates (PhD, Masters by Research MPhil and Professional Doctorates). Experienced Supervisor workshops augment successful supervision of graduate researchers by providing updates and introducing new information on key responsibilities of academic supervisors at the University of Melbourne including:

- knowing the relevant policy frameworks and requirements for graduate researchers
- selecting candidates and monitoring the quality of research in progress
- facilitating the timely completion of graduate research

***Enrolment via Themis***

With a University of Melbourne staff ID number you can simply click on the link ‘register here’ under the description of the workshop you would like to attend on our website (http://www.gradresearch.unimelb.edu.au/staff/supervisors/workshops.html) - make sure to scroll past the calendar - and once you've clicked on the link, enrol through Themis, as you would for any other University training. If this doesn’t work, email mgr-events@unimelb.edu.au for assistance.
